MAKE A DIFFERENCE THROUGH EDUCATING GIRLS OF KP AND FATA

Why Adopt a Girl Student?
Throughout Pakistan, nearly half all girls of school age are out of school because of cultural restraints, low household income, early marriages and non-availability of government schools. In KP and FATA, these figures are massively worse and contribute to ongoing high levels of illiteracy, poverty, poor health, family sizes and poor living conditions. The accompanying low status of women contributes to the prevalence of gender based violence and discriminatory cultural and traditional practices.

Khwendo Kor is a registered non-profit, non-partisan organization. We have been working in KP and FATA for women empowerment since 1993 and we focus on developing four main, inter-linked services: Education, Health, Civil Rights, Economic Empowerment as well as advocating for policy improvement in all these area and responding to humanitarian crises where these arise. Our aim is to create Viable Villages where improvements are sustained through the active involvement of the communities, including women and children, in identifying which are priority needs and then working together to see how all four areas can be developed.

You Have the Choice of;

Ramina a student graduated from KK school states:

I still remember when KK opened a school in our village in Dir in 2002. There was no local teacher and we were taught by a non local teacher. After completing my primary education KK convinced my family to allow me to continue my secondary education. I am so proud that now I am serving as a teacher in one of KK community based school.
